

April/May 2008

Christ Church Cathedral School places 4th on Vancouver Island and 30th in the Province in the Fraser Institute rankings of elementary schools in BC!

Every year the Fraser Institute publishes its ranking of elementary schools in BC, based on the results of the Foundation Skills Assessments in reading, writing and numeracy, which are written by students in grades 4 and 7.

The rankings this year were published on Friday May 2nd and Cathedral School ranked 4th on Vancouver Island and 30th in the whole of BC. We have not been ranked in previous years because we have not had enough students.

It is possible that we may not be ranked next year either because we only have 12 students in grade 7 this year. However, as the school grows we will be sure to be ranked. Like all these school or university rankings, the Fraser Institute rankings have their critics.

It is a only one measure of a School's achievement and does not take into consideration so much of what schools are doing to help students succeed. However, we are proud of the achievement of our students and their teachers and congratulate them on their success.
